DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 17-24, drawn to a coating admixture composition, classified in class 524, subclass 394.
- II. Claims 9-16 and 25-44, drawn to a machine component or gasket article, classified in class 277, subclass 592.

The inventions are distinct, each from the other because:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the intermediate product which is an admixture which is later cured is deemed to be useful as on any one of a variety of substrates or as a stand-alone film and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants. Note that the claims drawn to method of preparing the admixture (claims 19-24) and to the method for making a gasket (claims 41-44) have been grouped with their respective product claims given that the method limitations are not considered substantial enough to distinguish the product from the process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1714

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
